R2B SERIES

R2B™ SERIES HAND GRENADES

R2BM "MARKING POWDER GRENADE"

//INFO	R2BM
DIMENSIONS	Ø53, L110 MM.
WEIGHT	120 g.
BUNDLE	6 pcs.

130 dB

Powder grenade is a revolutionary new product for training and tactical games world, it provides loud blast and good colorful marking. Designed for game or training, this grenade will give you, your teammates and your opponents – additional motivation to play better. It's filled by colorful marking powder and brings a good spread radius of 2-5 meters.

R2B "PAINTBALL GRENADE"

//INFO	R2B
DIMENSIONS	Ø53, L110 MM.
WEIGHT	100 g.
BUNDLE	6 pcs.

130 dB

Paintball grenade is a revolutionary new product for training and tactical games world, it provides loud blast and good and health-safety liquid paint fragmentation. It's filled by 50 cal paintballs and brings a good fragmentation with marking for 8-10 meters. This training grenade equipped by two safety mechanisms - safety pin with ring and lever.

R2BS "AIRSOFT GRENADE"

//INFO	R2BS
DIMENSIONS	Ø53, L110 MM.
WEIGHT	110 g.
BUNDLE	6 pcs.

130 dB

Airsoft grenade is a revolutionary new product for training and tactical games world, it provides loud blast and good and health-safety fragmentation. Designed for game or training, this grenade will give you, your teammates and your opponents – additional motivation to play better. It's filled by 6mm 0.20g BBs and brings a good fragmentation with radius of 10-12 meters.

G1-B
PROJECT

G1-B PROJECT™ SERIES PROJECTILES

"SHELL"

//INFO	"SHELL"
CALIBER	36 MM.
WEIGHT	110 g.
BUNDLE	130X47X47 MM.
Operating t° range	from +10°C to +35°C

The launching shells are made for throwing our projectiles from paintball and airsoft launchers without any modifications. The ballistics trajectory of the polyurethane projectiles launched from "Shell" is similar to a real one, but it doesn't have enough energy to hurt player/trainee because its light weight. Strike of a projectile is similar to the strike of a paint ball. Accordingly, all players have to be equipped respectively. Propellant – Green/Red gas.

"PALADIN"

//INFO	"PALADIN"
DIMENSIONS	Ø36, L86 MM.
WEIGHT	25 g.
BUNDLE	10 pcs.

The non-pyrotechnic marking projectile "Paladin" is filled with non-toxic powder based on an easy to wash, food coloring components. At the moment when projectile strikes the obstacle, the thin shell cracks and the powder marks the surface.

"PECKER"

//INFO	"PECKER"
DIMENSIONS	Ø36, L94MM.
WEIGHT	27 g.
BUNDLE	10 pcs.

The M203 has the inherent accuracy to place grenades into windows at 90 meters and bunker apertures at 50 meters (164 ft). These ranges are significantly reduced as the angle of obliquity increases. Combat experience shows that M203 gunners cannot consistently hit windows at 50 meters when forced to aim and fire quickly. Sharp your skills with "Pecker" dummy projectile!

TAGinn
PRO

G1-B PROJECT™ SERIES PROJECTILES

"VELUM"

//INFO	"VELUM"
DIMENSIONS	Ø36, L94 MM.
WEIGHT	35 g.
BUNDLE	10 pcs.

"Velum" designed for a Smokescreen or waypoint marking purposes and has very important features like a lightweight, traumatic, fire and health safety, very dense smoke that produces during the "cold burning" process.
This is an only a smoke round that can be thrown to an animy position at such range to make him "blind" for a while.
Smoke deployment time - appx 30 seconds.

"REAPER"

//INFO	"REAPER"
DIMENSIONS	Ø36, L94 MM.
WEIGHT	30 g.
BUNDLE	10 pcs.

Projectile for an airsoft/paintball grenade launcher is a pyrotechnic, commercially manufactured device that taking your training or game to a completely new level. The projectile is made of traumatic-safe, lightweight polyurethane foam. The unbelievable accuracy of this grenade, caused by its spinning movement during the flight. This spinning stabilizes the grenade until initiation (3 seconds after the launch).

"ARCHANGEL"

//INFO	"ARCHANGEL"
DIMENSIONS	Ø36, L86 MM.
WEIGHT	25 g.
BUNDLE	10 pcs.

This projectile is a sound-flash and has no any additional fragmentation except of its own body. This launching grenade is designed to hit a campered "enemy" or vehicles and has very important features like a lightweight, traumatic safe but loud blast, extremely accurate trajectory.
"Archangel" projectile will detonate at the moment of strike.

SIMULATION series

SIMULATION series HAND GRENADES

"TAG-67"

//INFO	"TAG-67"
DIMENSIONS	Ø53, L90 MM.
WEIGHT	120 g.
BUNDLE	6 pcs.

130 dB

The next generation, pyrotechnical MilSim device repeating the look and the feel of the real legendary M67 hand grenade. The new design of pyrotechnical element making this grenade ultimately safe and effective. TAG-67 fits all the standard pouches for M67 grenades. It's filled by 6mm 0.20g BBs and brings a good fragmentation with radius of 10-12 meters

"FBG-6"

//INFO	"FBG-6"
DIMENSIONS	Ø53, L130 MM.
WEIGHT	80 g.
BUNDLE	20 pcs.

140 dB

The purpose of this stun grenade is to attract the enemies attention, or to disable them for a short period of time in order to breach their defence without "killing" anyone in the room. It perfectly suits "hostage rescue" scenarios. It may also be used as a frag grenade simulator where fragmentation projectiles are not allowed.

"TACTICAL SMOKE"

//INFO	"Tactical Smoke"
DIMENSIONS	Ø53, L130 MM.
WEIGHT	200 g.
BUNDLE	6 pcs.

140 dB

This grenade is an essential item in your load-out. If you or your team are under suppressing fire, you will need a proper solution. R2B TS is your answer. This grenade will deploy an instant, very dense smoke and will burn for 35 seconds. It temperature of the surface and smoke is not over than 87C'. This means that it is a completely fire-safe device for use in dried grass or similar environments.

SIMULATION series PROJECTILES

"REAPER MK2 – PRO"

//INFO	"REAPER-PRO"
DIMENSIONS	Ø36, L.94 MM.
WEIGHT	28 g.
BUNDLE	10 pcs.

Specially designed for use with the TAG-ML36 grenade launcher. This projectile has become even more accurate, reliable and safe. The 'head' of this projectile is made of the softest material possible for correct ballistic travel and allowing it to unfold itself on impact in order to reduce the projected energy. Similar to a regular "Reaper", it going off 3 seconds after the shot.
Reaper MK2 – PRO is fully compatible with all TAGinn devices.

TAG-25DP - "FATE"

//INFO	TAG-25DP "FATE"
DIMENSIONS	Ø36, L.100 MM.
WEIGHT	30 g.
BUNDLE	10 pcs.

This replica of the Soviet 40mm VOG-25P grenade is made for the TAG-015 grenade launcher. However, this projectile is compatible with any of TAGinn's launching devices.
The TAG-25DP is a hybrid grenade that will initiate on impact with a hard surface. If the surface isn't too hard or you have missed the target, the TAG-25DP will also detonate by timer. It has a built-in 6 seconds fuse that starts burning the moment it is fired.

CASE

//INFO	GASE
DIMENSIONS	Ø36X40 MM.
WEIGHT	12 g.
BUNDLE	10 pcs.

These reusable cases are necessary for shooting TAGinn projectiles out of the TAG-ML36 grenade launcher.
After each shot, you will need to remove a case same way you would do it in a real life.
During the game or training you will have a fair chance to lose some cases, but don't worry, you can purchase more for a low price.

015 PROJECT SERIES LAUNCHING SHELLS

"SHELL - PRO"

//INFO	"SHELL-PRO"
CALIBER	36 мм.
WEIGHT	110 g.
BUNDLE	130X47X47 мм.
Operating t° range	from -10°C to +25°C

This launching device was designed for the law enforcement and military use, but also an aggressive airsoft and paintball players are welcome to use it. Powered by unregulated CO2 (600-800 PSI). The new system is providing the safe muzzle velocity like in a regular "Shell", but allowing to use it in a cold weather (up to -10' C). This device is ultimate solution for any weather and for any types of game or army training.

"SHELL-VOG"

//INFO	"SHELL-VOG"
CALIBER	36 мм.
WEIGHT	90 g.
BUNDLE	120X47X47 мм.
Operating t° range	from -10°C to +25°C

D-boys GP-25 VOG compatible launching device for TAGinn projectiles. The "VOG-Shell" ™ letting the owners of a cheapest GP-25 grenade launchers, to use a TAGinn projectiles. Powered by CO2 gas. This shell is more expensive than others because of a very special design. The D-Boys GP-25 launcher's barrel caliber is a significantly smaller than the airsoft "40mm" GL standard, the solutions that we have used in the "VOG Shell" are costly but very effective.

"FiSt"-FILLING STATION

//INFO	"FiSt"
WEIGHT	100 g.
BUNDLE	157X35X35 мм.
Operating t° range	from -10°C to +30°C

Filling Station – "FiSt"™. Designed for filling a new "015 project" launching devices ""VOG-Shell"™ and "Shell-Pro"™ using a 12g CO2 cartridges. The long nozzle is specially adapted for filling a new launching devises. Also compatible with all other CO2 powered devices with standard inlet valve.

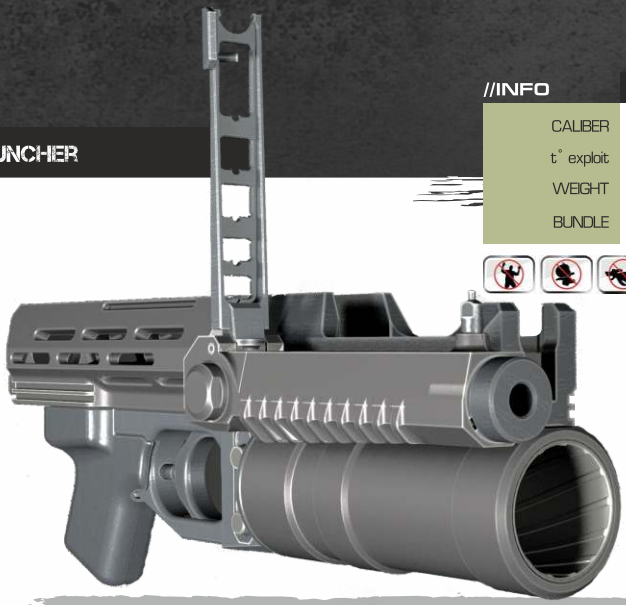
SHELL-LESS
AK-SERIES

TAG-015 AK-SERIES GRENADE LAUNCHER

"TAG-015" LAUNCHER



//INFO	LAUNCHER
CALIBER	36 MM.
t° exploit	from -5°C to +30°C
WEIGHT	1000 g.
BUNDLE	325X120X77 MM.

The "TAG-15"™ Shell-less Grenade Launcher. This GL is allowing you to shoot without using any preloaded cartridges like a TAG "Shells" or "BB Showers", but by directly inserting a 36mm TAG projectiles inside a "TAG-15" riffled barrel. The special "QRC" (Quick Reload Chamber) system, allowing to replace a 12gr CO2 tank just in 3 seconds without any additional tools. The incredible fire rate, efficiency and accuracy will let you shoot 10-12 shots using single 12gr CO2 cartridge, right on your target.

GAS TUBE

//INFO	GAS TUBE
WEIGHT	125 g.
BUNDLE	150X250X40 MM.

The extension for TAG-015 launcher.
This upgrade will make the launchers module more solid and add new options for attaching more devices to a side 20mm rail.

Including:
2 x Side "Picattini" rails.
1 x Gas tube and handguard assembly.

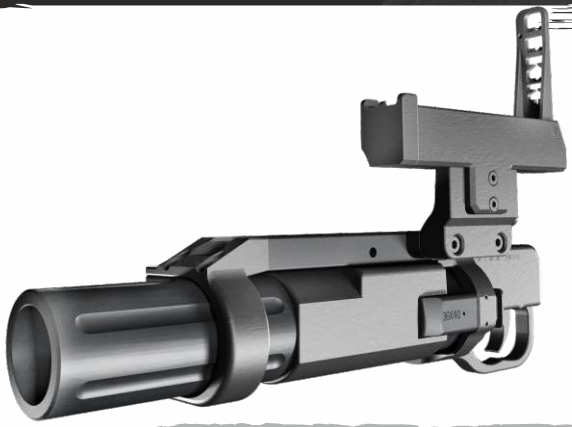
TAG-ML36 GRENADE LAUNCHER

Madritsch Waffentechnik

"TAG-ML36" GRENADE LAUNCHER



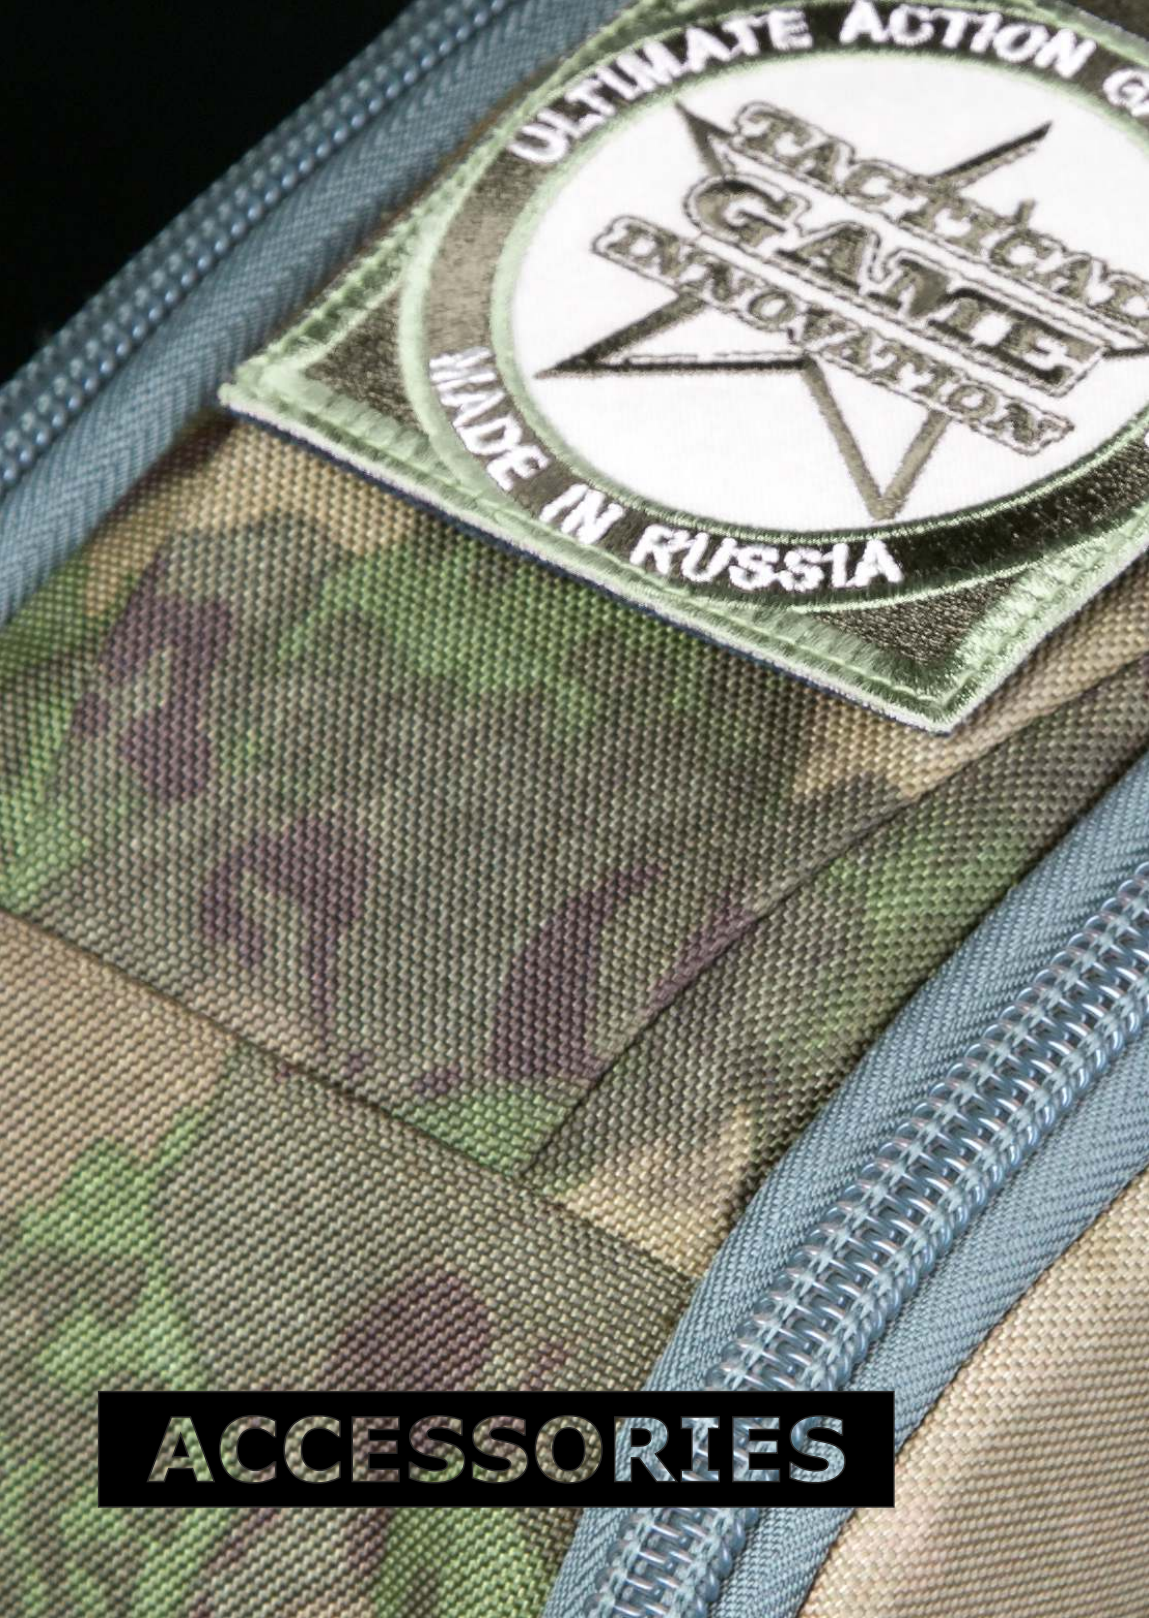
//INFO	LAUNCHER
CALIBER	36 MM.
t° exploit	from -5°C to +30°C
WEIGHT	1050 g.
BUNDLE	325X120X77 MM.

The TAG-ML36 Grenade Launcher with its rifled TAGinn barrel is a shell-less launcher that fires TAGinn projectiles directly without the need of any launching "Shell". The TAG-ML36 is a mutual project of TAGinn and "Madritsch Weapon Technology". TAG-ML36 is a pneumatic training system for the ML-40 launcher by "Madritsch WT". This launcher may be installed on any 20mm under-barrel rail, or on a special standalone chassis. Powered by a 12g CO2 cartridge TAG-ML36 may shoot 8-10 consistent shots per cartridge.

STANDALONE CHASSIS FOR TAG-ML36

//INFO	STANDALONE CHASSIS
WEIGHT	325 g.
MATERIAL	ALUMINUM, ABS

This device is a highly effective and smart platform for your TAG-ML36 grenade launcher. The purpose of this chassis is not only to make the TAG-ML36 independent of your primary weapon, but also to extend aiming possibilities by adding a red-dot, optical scope or any other special aiming device on multiple 20mm "Picattiny" rails. There's another great feature hidden inside of this platform – the additional chamber for 2 X 12g CO2 tanks in order to extend a number of shots-per-load up to 20.



ACCESSORIES

TAGGEAR™ POUCHES

TAGINN "SINGLE HAND GRENADE POUCH"

//INFO	TAGinn "Single hand grenade pouch"
DIMENSONS	W 160 H 80 D 70 MM.
WEIGHT	80 g.
MATERIAL	CORDURA 1000

This pouch is compatible with the entire line of TAGinn grenades. It designed to be used with Velcro for a faster pull, or with a "Fastex" lock for the silent deployment. The special lids cover the Velcro surface to avoid noise during opening.

TAGINN "DOUBLE HAND GRENADE POUCH"

//INFO	TAGinn "Double hand grenade pouch"
DIMENSONS	W 160 H 170 D 70 MM.
WEIGHT	135 g.
MATERIAL	CORDURA 1000

This pouch is compatible with the entire line of TAGinn grenades. It is designed to be used with Velcro for the faster pull, or with a "Fastex" lock for the silent deployment. The special lids cover the Velcro surface to avoid a noise during opening.

TAGINN "BATTLE POUCH"

//INFO	TAGinn "Battle pouch"
DIMENSONS	W 230 H130 D90 MM.
WEIGHT	255 g.
MATERIAL	CORDURA 1000

This is universal carry pouch for the full range of TAGinn ammo and "Launching shells".
You can store up to 8 projectiles and/or shells in this pouch, plus the filling station and 12g CO2 gas cartridges.
The smart design enables you to fill up and use your ammo in the most comfortable and fastest way possible.

REPLACEMENT BARREL-"SHELL"

//INFO	REPLACEMENT BARREL
CALIBER	36 MM.
WEIGHT	17 g.
BUNDLE	150X250X40 MM.

If your launcher's barrel has been lost or broken - never mind, you may purchase a new one instead of a whole launching device.

Fits “SHELL” and “SHELL-PRO”.

REPLACEMENT BARREL-"SHELL-VOG"

//INFO	REPLACEMENT BARREL
CALIBER	36 MM.
WEIGHT	35 g.
BUNDLE	150X250X40 MM.

If your launcher's barrel has been lost or broken - never mind, you may purchase a new one instead of a whole launching device.

Fits “SHELL-VOG”

REPAIR KIT FOR "SHELL"

If the worst does happen and you manage to wear it out or lose bits, we do have the complete internal replacement kits.
Bundle:
4 Stainless bearings
1 large o-ring
2 small o-rings
1 inlet valve

REPAIR KIT FOR "SHELL-PRO"/"SHELL-VOG"

Bunch of spare parts for the CO_2 operated shells.

Bundle:
4 Stainless bearings
1 large o-ring
2 small o-rings
1 inlet valve

Legend:

- Not for human target.

- Keep away from children.

- Do not shoot animals.

- Use safety gloves.

- Use eye protection.

- Report volume.

- For use with Co2 gas only.

- Good for use with “green/power-up gas”.

FIRE IN THE HOLE!
